PROJECTS

CALCULATOR
create a calculator with basic mathematical functionalities using CSS, HTML, and JavaScript. Calculators require an interactive interface to perform basic functions such as addition, subtraction, division, and multiplication. It will need a display screen to display the user's input and give the results

INTERNSHIP

1.intern at internPE
1 Month-training(April)
C++ programming :- 1 month training program in C++ programming at internPE. This intensive program is enhancing my skills in C++ programming, enabling me to develop efficient and robust software solutions

2.intern at CodeClouse
1 Month-training(April)
Web development :- "I completed a one-month training in web development at CodeClause Pvt Ltd, where I gained hands-on experience in building websites using HTML, CSS, and JavaScript. This training enhanced my skills in front-end development and provided me with valuable insights into the web development industry."
